Beyond Solar was founded by two Clean Energy Council accredited and experienced installers with a passion for the Australian Solar industry. The founders have been active in the industry for a combined 15 years, working with some of Australia's largest solar retail companies as installers, consultants, designers and project managers overlooking some of Australia's largest commercial installations. Our vision was to cut out the middle men that make premium solar systems sometimes prohibitively expensive and get our customers on the road to saving their hard earned money and the earth we live on. Our passion for the industry and the environment and the lessons learnt from installing inferior inverters and panel brands for retailers lead to the establishment of Beyond Solar.
