

New England Solar Power

110 Taylor Street
Armidale, New South Wales 2350
Australia

Phone: 02 6772 6233

New England Solar power has extensive experience in commercial solar systems up to and beyond 100 kW. We have successfully negotiated connection agreements for many commercial scale solar PV projects, ranging from 10kWp to 315kWp. This involves providing schematics of the specific designs, and ensuring that voltage rise in the installation is minimised, and all connections meet the NSW Service & Installation Rules. On occasion this requires additional network protection equipment; we have the expertise to carry out this work.
