Australia

Phone: 02 9089 8808

OneSolar International is a leading global manufacturer of solar panel solutions for the residential and commercial market. We are revolutionizing the solar industry by providing the world's first fully integrated 'one-stop-shop' service that controls the whole process of manufacturing, solar system installation and servicing of all solar system applications.

The old way of purchasing solar is no longer good enough as it provides a system that is thrown together to try and give you a system that may or may not work efficiently. Not only does the current set up give you a system that works inefficiently, it may cost you loads of money to fix later down the track.

Battery Brands: Enphase
Solar Panel Brands: Karbon, Silicon4
